

I would like to voice that I AM AGAINST the transfer of satellite frequencies to EchoStar. Although I am not a VOOM customer, I have seen it in action and plan to subscribe as soon as we purchase our first HDTV this summer. Transfer of these licences would limit VOOM's transmission capabilities and impede customer acceptance of HDTV. As I understand it, the VOOM service has a buyer who is wanting to keep it operational at it's present location. I believe the Commission should DENY this transfer since it is in the best interest of the American consumer.
